

GLA-02 US
Patent

AMENDMENTS TO THE SPECIFICATION

Replace the first full paragraph, lines 5-7, on page 20 of the original specification with the following paragraph:

The switch 26 then sends the respective broadcast video and VoIP audio signal feeds at a bitrate of about 100-1000 Mbytes/s via the DS1 or DS3 line to, for example, a satellite transmitting station 27 or other well known means of accessing the Internet.
